

Powerful Solutions

JCB ENERGY does more than only offer top-notch goods. We provide effective solutions to advance your company. Strong compressors that work well on the toughest task locations. Reliable and effective generators and light towers. It becomes abundantly evident that working with us is a wise return on your investment when you take into account our sector-leading service and support. A user-friendly design with simple operation.

Dependability

In order to provide you piece of mind, JCB ENERGY is totally devoted to providing high-quality machines that optimize uptime and increase the productivity.

Performance

JCB energy provides you with the energy you require in the most effective way possible. We offer the best fuel efficiency and performance while maintaining adherence to the most recent pollution regulations.

Serviceability

JCB energy has a vast and well-informed dealer network.

All our products are built and designed with an emphasis on accessibility to ensure that routine maintenance may be done quickly and easily.

A nearly maintenance-free diesel oxidation catalyst (DOC) aftertreatment system is a characteristic of the high performance Jcb Energy.

For a variety of applications, standard units provide multi-voltage and 50/60Hz capabilities.

JSR 25-40 TRAILER GENERATORS

Look to Jcb Energy Portable electricity when you want consistent, trustworthy electricity. Our mobile generator lineup, which is available for applications ranging from 25 to 570 kVA, can handle the rigorous demands of clients in the rental, building, events and entertainment, and disaster recovery industries, these tough packages are made to perform in the harshest environments. You can be sure that your generator has the quality and durability to meet the demands of the most demanding applications.

Jcb energy diesel engines, which are efficient in terms of fuel, power the G25-70 line. These cutting-edge engines were created to be strong and dependable while fulfilling EPA tier 4 emissions criteria without the need of diesel particulate filters. These powerful engines also ensure precise frequency stability with their exceptional transient response.

JSR25 PRIME POWER RATING 25 kVA | 20 kW

JSR40 PRIME POWER RATING 39 kVA | 31 kW

JSR 50-70 TRAILER GENERATORS

In order to function at maximum load in hot environments, the dependable Jcb Energy container is acoustically treated to reduce sound levels as low as 63dB(A).

Jcb Energy mobile generators have skid base frames with integrated large capacity fuel tanks that give at least 24 hours of full load operation.

Furthermore, the base frame is a component of the environmental containment system, which prevents leaking of gasoline or oil outside of the package and protects the environment. Our heavy-duty running gear system installs simply to the base frame and has low-profile, torsion-style axles with your choice of electric or hydraulic surge brakes, bolt-on fenders, and adjustable height hitches for safe and simple towing on and off the road.

JSR50 PRIME POWER RATING 48 kVA | 38 kW

JSR70 PRIME POWER RATING 70 kVA | 56 kW

JSR 125-150 TRAILER GENERATORS

The enhanced controls from Jcb Energy incorporate an LCD display that communicates any warnings or shutdowns. Furthermore, the controller logs all system problems, which substantially assists technicians with troubleshooting. The system also allows for remote start/stop control as well as interaction with other telematics systems.

The user-friendly operator panel has a powerful controller as well as a full array of analog gauges, substantially simplifying control and monitoring.

JSR125 PRIME POWER RATING 125 kVA | 100 kW

JSR150 PRIME POWER RATING 154 kVA | 123 kW

JSR 190-240-325 TRAILER GENERATORS

Jcb Energy uses high-quality insulating materials to provide extended life and resistance to dust and moisture, which are typical in mobile applications.

Jcb Energy mobile generators were created with service technicians in mind. With intervals between fluid and filter exchanges, you can be sure that maintenance downtime is kept to a minimum. All service locations are conveniently accessible and designed to provide quick and easy service.

JSR190 PRIME POWER RATING 181 kVA | 145 kW

JSR240 PRIME POWER RATING 236 kVA | 188 kW

JSR325 PRIME POWER RATING 334 kVA | 270 kW

JSR 450-570 TRAILER GENERATORS

Powerful alternators are required for demanding applications. Jcb Energy specifies high-output, separately-excited alternators to offer unrivaled motor starting capabilities and precise voltage management.

JSR450 PRIME POWER RATING 456 kVA | 365 kW

JSR570 PRIME POWER RATING 570 kVA | 456 kW
